ADHD: living wit Kutscher, Martin L.	hout brakes
Read Online	Now in paperback, this concise and highly accessible book contains everything that parents and busy professionals need to know about ADHD. The author describes the spectrum of ADHD, the co-occurring symptoms, and common difficulties that parents face. The rest of the book focuses on solutions, based around four rules. Rule number one is keeping it positive: punishments can change behavior, but only positive approaches can improve attitude. Rule number two is keeping it calm: it's difficult thinking clearly enough to solve problems logically if you are feeling overwhelmed. Rule number three is keeping it organized: this rule relates particularly to the child's school life. Rule number four is to keep doing rules one to three. Finally, Dr. Kutscher discusses the role of medication for treating ADHD. The concluding chapter summarizes the information covered and can also be read as a complete, freestanding text. Useful checklists and further reading recommendations are also included.

The AIDS Pandemic explores the ways in which HIV/AIDS has, and continues to transform the wide range of related disciplines it touches. Novel perspectives are provided by a unique panel of internationally recognised experts who cover the unprecedented impact onf AIDS on culture, demographics and politics around the world, including how it affected the worlds' economy, health sciences, epidemiology and public health. This important far- reaching analysis uses the lessons learned from a wide array of disciplines to help us understand the current status and evolution of the pandemic, as it continues to evolve.

- \* Unique and timely presentation of new theories and perspectives
- \* Concentrates on the changes that have taken place in a broad array of related disciplines
- \* Provides key contextual information. for those new to the field or at interface areas between disciplines
- \* Includes an international focus on evolving African and Asian experiences
- \* Focuses on the current strategies for developing vaccines and microbicides \* Outlines harm reduction and prevention programs
- Explores issues related to delivery of life-saving AIDS medications in resource-
- constrained environments
